

FERRY NEWSLETTER

August 27, 2009

This is to advise all Pierce County Ferry users that beginning on August 31, 2009 the MV Christine Anderson will be undergoing the required 6,000 hour service to the two main engines, required 3,000 hour service to the two generators followed by dock trials and underway load testing. The work was competitively bid and will be conducted by Tacoma Diesel and Equipment Inc.

Work will be accomplished after the last run on August 31, 2009 and cease at 4:45 A.M September 01, 2009. The contract calls for this service schedule to be repeated on September 01, 02, 03, 08 09 and 10 though the contractor is anticipating that the full seven days will not be required.

I only bring this to your attention as there may be a rare occasion where maintenance vehicles and personnel may be on board during normal operation to observe performance of the previous evenings work.

Sincerely,

A handwritten signature in black ink that reads "M D Esher". The signature is written in a cursive, flowing style.

Michael D. Esher
Ferry and Airport Administrator
