

Re-Art Endeavor Intermediate School

Third grade students at Endeavour Intermediate School learned about natural resource cycles and conservation by collecting household items that were to be trash or recycled and used these items to create art. The students then held an art show for parents and showed off their artistic skills and explained how people use natural resources. This project was well-received by students and teachers as an opportunity to be hands-on and creative while learning about science.

Lessons:

- Incredible Journey
- Water Conservation—
The Sponge Activity
- Compost Critters
- No Time to Waste

Project:

- Up-Cycled Art

Partnerships:

- Endeavor Intermediate School
- Pierce County Public Works
