

Planning and Public Works Department DEVELOPMENT ENGINEERING DIVISION POLICY

| | |
|---------------------------------|--|
| Policy Number: | DE POL - 4015 |
| Title: | New Potential Landslide Hazard Area Mapping |
| Date: | February 1, 2018 |
| Management Approval: |  |
| Code Section References: | 18E.10.140, 18E.80.020 |

The following policy applies to Development Engineering Staff and is to be used during the implementation of Title 18E.80 "Landslide Hazard Areas".

Policy:

Staff should begin using the new Department of Natural Resources Landslide Hazard Mapping that was completed in 2017 as an additional source for determining when to require a landslide hazard area geological assessment. The new landslide hazard maps are currently located in the following themes:

While the new mapping is considered to be a significant accuracy and thoroughness improvement over previous mapping staff should be aware that they still have the ability to require a geological assessment when other landslide hazard indicators as contained in 18E.80.020.A are found to exist, even if the indicator locations do not match the new mapping.
